

# CHAIN BRISTOL 2026

## Talks theme: The Future of Engineering

The world faces a variety of challenges that require complex and targeted approaches to deal with. With industries like, transportation, energy, construction needing to have a paradigm shift to meet the needs of the future. This panel comprised of individuals from a diverse range of industries explores the transformative innovations, interdisciplinary collaborations, and emerging responsibilities that are redefining the engineering profession.

Join us as we discuss how engineers are driving sustainable solutions, integrating AI and digital tools, and preparing for a world that demands agility, creativity, and resilience.

Institution of  
**Power Engineers**

Institution of  
**MECHANICAL  
ENGINEERS**

Date: 11th February, 2026  
Time: 6:00 pm – 10:00pm

Engineering Building, UWE  
Frenchay Campus, Bristol
